## Magellan

Magellan - modern 9-cell main Ram-Air canopy of popular intermediate class

Due to the technological innovations applied in its design, Magellan is consistently stable and predictable!

- comfortable, consistent openings
- soft and easy to master steering
- good gliding performance
- easy on front risers
- stable and easy to perform flare
- good sloop performance

All of the above make Magellan your reliable fun partner in day-to-day skydiving activities.

Loaded up to 1.2 lb/sq.ft. Magellan offers smooth steering and low descent rate, which makes it easy to handle also for the beginners.

Recommended wing loading range is 0.95 – 1.85 lb/sq.ft. Wing loading for the best flight performance lies in the range of 1.2 – 1.6 lb/sq.ft.

Magellan is made of ZP fabric in following sizes: 100, 110, 120, 130, 140, 150, 160, 170 and 190 sq.ft. The canopy is equipped with Vectran lines, collapsible slider with stainless grommets and comes with the set of soft links.
