INFORMATION BULLETIN

BATTERY REPLACE REMINDER

The following information is a reminder that all Vigil batteries (Vigil I, II & 2+) must be replaced after 10 years + maximum 3 months from the date of manufacturing of your Vigil.

Remark: the battery DOM could be up to 12 months older than your Vigil DOM. This extra year tolerance has been taken into account when your Vigil was manufactured.

A battery replacement is mandatory when:

- «Bat Low» or «Bat Rpl» message appears on the controller screen, or
- When the Vigil has reached 10 years + maximum 3 months.

If you have a Vigil I, and have not already exchanged your battery, we recommend doing so during the next reserve repack.

Extra information to take into account on Vigil II only:

- Do not leave your Vigil disconnected from the battery for more than three days. (See manual page 27).
- After changing the battery it is recommended to wait minimum 12 hours before switching the Vigil unit back on.

Regards,
Vigil Team
