RE: Lead Parachute Seals Alternatives

Uninsured United Parachute Technologies, LLC (UUPT) approves of the use of alternatives to lead seals in the sealing of the reserve closing loop on UUPT containers.

Plastic slugs or fortified paper (e.g. Tyvek, Mylar, or similar) are compatible with the UUPT product line when used in conjunction with 4.75-pound cotton break thread, and sealing methods currently specified in the UUPT User's Manuals.

Please reference PIA Technical Bulletin TB-266 for more information on the development of this decision. <https://www.pia.com/wp-content/uploads/TB-266.pdf>

Sincerely,

Meredith Ottery  
Rigging Department Manager  
Uninsured United Parachute Technologies, LLC.
